DETAILED ACTION

Allowable Subject Matter

Claims 1-20 allowed.

The following is a statement of reasons for the indication of allowable subject matter: the prior art of record fail to teach a time measuring circuit comprising a first and second circuits that teach have a plurality of outputs representing a delayed clock and a delayed stop signal at each output; a third circuit accepts the outputs from the first and second circuits to produce a digital output representing the coincidence between one of the first plurality of signals and one of the second plurality of signals, and in combine with the remain limitations of claims 1 and 12, nor would it be obvious to modify the art of record so as to include the above limitations. Although Sartschev et al. [US 6,073,259] disclose a timing generation circuitry, Chu [US 4,164,648] disclose a double Vernier time interval measurement using triggered phase-locked oscillators and Murakami [US 5,872,745] disclose a time measuring method and system which enable to discriminate whether or not the measurement result is within the required measurement, they do not disclose the above-mentioned limitations.
